PROFILE

Full Stack .NET Developer with **4+ years** of experience in developing scalable and high-performance web and desktop applications. Skilled in building responsive, user-focused solutions and ensuring technical excellence. Detail-oriented and collaborative team members with strong problem-solving skills. Seeking to contribute expertise to dynamic and growth-oriented software development teams.

EDUCATION

Bachelor of Computers and Information - Major in Information Systems -

Kafr El-Sheikh University, Egypt

Sep 2020 - Jul 2024

Graduation Project: Health Hub A medical platform and mobile application that educate users on first aid and facilitate blood and medicine donations through hospitals and charities.

EXPERIENCE

- **.NET Full Stack Developer (Freelance)** **Oct 2022 – Present**
 - Design, develop, and maintain web and desktop applications for multiple clients.
 - Build responsive user interfaces and integrate APIs to enhance functionality and performance.
 - Collaborate directly with clients to define requirements, deliver tailored solutions, and ensure high-quality results.
 - **Cashier, Sweet Shop** **Sep 2019 – Oct 2021**
 - Processed customer payments quickly and accurately in a busy dessert shop.
 - Assisted customers with inquiries and resolved issues politely and efficiently.
 - Maintained accurate cash handling and daily balance records.
-

INTERNSHIP

- **Full Stack .NET & Angular, 6-Month Program, Intensive Training Program (ITP),**
Information Technology Institute (ITI),
Ministry Of Communication Technology (MCIT), Tanta Branch **Jul 2025 – Present**
- **Full Stack .NET, Summer Code Camp (SCC),**
Information Technology Institute (ITI),
Ministry Of Communication Technology (MCIT), Mansoura Branch **Feb 2022**

PROJECTS

▪ **Eventix (MVC)**

Freelance Project – Ticket Booking Platform

- Developed a platform for event organizers to manage and sell event tickets easily.
- Enabled users to browse and book events through an intuitive and responsive interface.
- Designed an admin dashboard to manage users, roles, and event categories.
- Implemented authentication, authorization, and efficient data workflows.
- Built using **.NET Core, C#, EF Core, SQL Server, HTML, CSS, Bootstrap, JavaScript, and jQuery.**

▪ **Health Hub (MVC & API)**

Graduation Project – Medical Web Platform

- Developed a medical platform for first aid education and blood/medicine donation.
- Enabled hospitals and charities to manage donor requests and contributions.
- Designed an admin dashboard to manage users, permissions, and categories.
- Implemented authentication, authorization, and efficient data management workflows.
- Built using **.NET Core, C#, API, EF Core, SQL Server, HTML, CSS, Bootstrap, JavaScript, and jQuery.**

▪ **E-Commerce API**

Freelance Project – Web API for Online Store Management

- Developed a scalable API for managing products, orders, customers, and users.
- Implemented JWT authentication and role-based authorization for secure access.
- Designed clean RESTful endpoints with DTO and AutoMapper patterns.
- Added global exception handling, structured logging, and input validation.
- Built using **.NET 9, C#, EF Core, and Swagger** for documentation and testing.

▪ **POS & Factory Management Systems (Desktop)**

Freelance Projects – Business and Factory Management Solutions

- Developed multiple desktop applications for POS, inventory, and factory management.
- Enabled businesses to manage sales, purchases, expenses, stock, and employee operations efficiently.
- Designed reporting modules for tracking performance, costs, and attendance with detailed analytics.
- Built using **C#, WinForms, EF Core, SQL Server, LINQ, and RDLC Reports.**
- **Successfully deployed and currently used by multiple local businesses.**

▪ **Student & Academy Management System (Desktop)**

Freelance Project – Student and Financial Management Solution

- Developed a desktop system to manage students, employees, and academy finances.
- Automated payments, expenses, attendance tracking, and performance reporting.
- Simplified full operational and financial management through detailed reports.

- Built using **C#, WinForms, EF Core, SQL Server, LINQ, and RDLC Reports.**
 - **Currently active and used by a local academy for daily operations.**
-

TECHNICAL SKILLS

- **Backend:** C# | OOP | ASP.NET Core | MVC | Web APIs | SignalR | WinForms | Clean Architecture.
 - **Databases & ORM:** Microsoft SQL Server | LINQ | Entity Framework | EF Core | ADO.NET | Dapper.
 - **Core Concepts:** C++ | Problem Solving | Data Structure | SOLID Principles | Design Patterns | Agile | Git | GitHub.
 - **Frontend Using Angular:** HTML5 | CSS3 | Bootstrap | jQuery | JavaScript | TypeScript.
-

INTERPERSONAL SKILLS

- Communication Skills.
 - Presentation Skills.
 - Leadership.
 - Time management.
 - Teamwork.
 - Active learning.
 - Project management.
 - Research.
-

LANGUAGE

- Arabic (Native)
- English (Good)
